

#EnterpriseTrainings

Amazon Quick Customized Training For Fortune 50 Enterprises

Core Topics Covered in Hands-On Training

Delivered by Seasoned Generative AI Experts

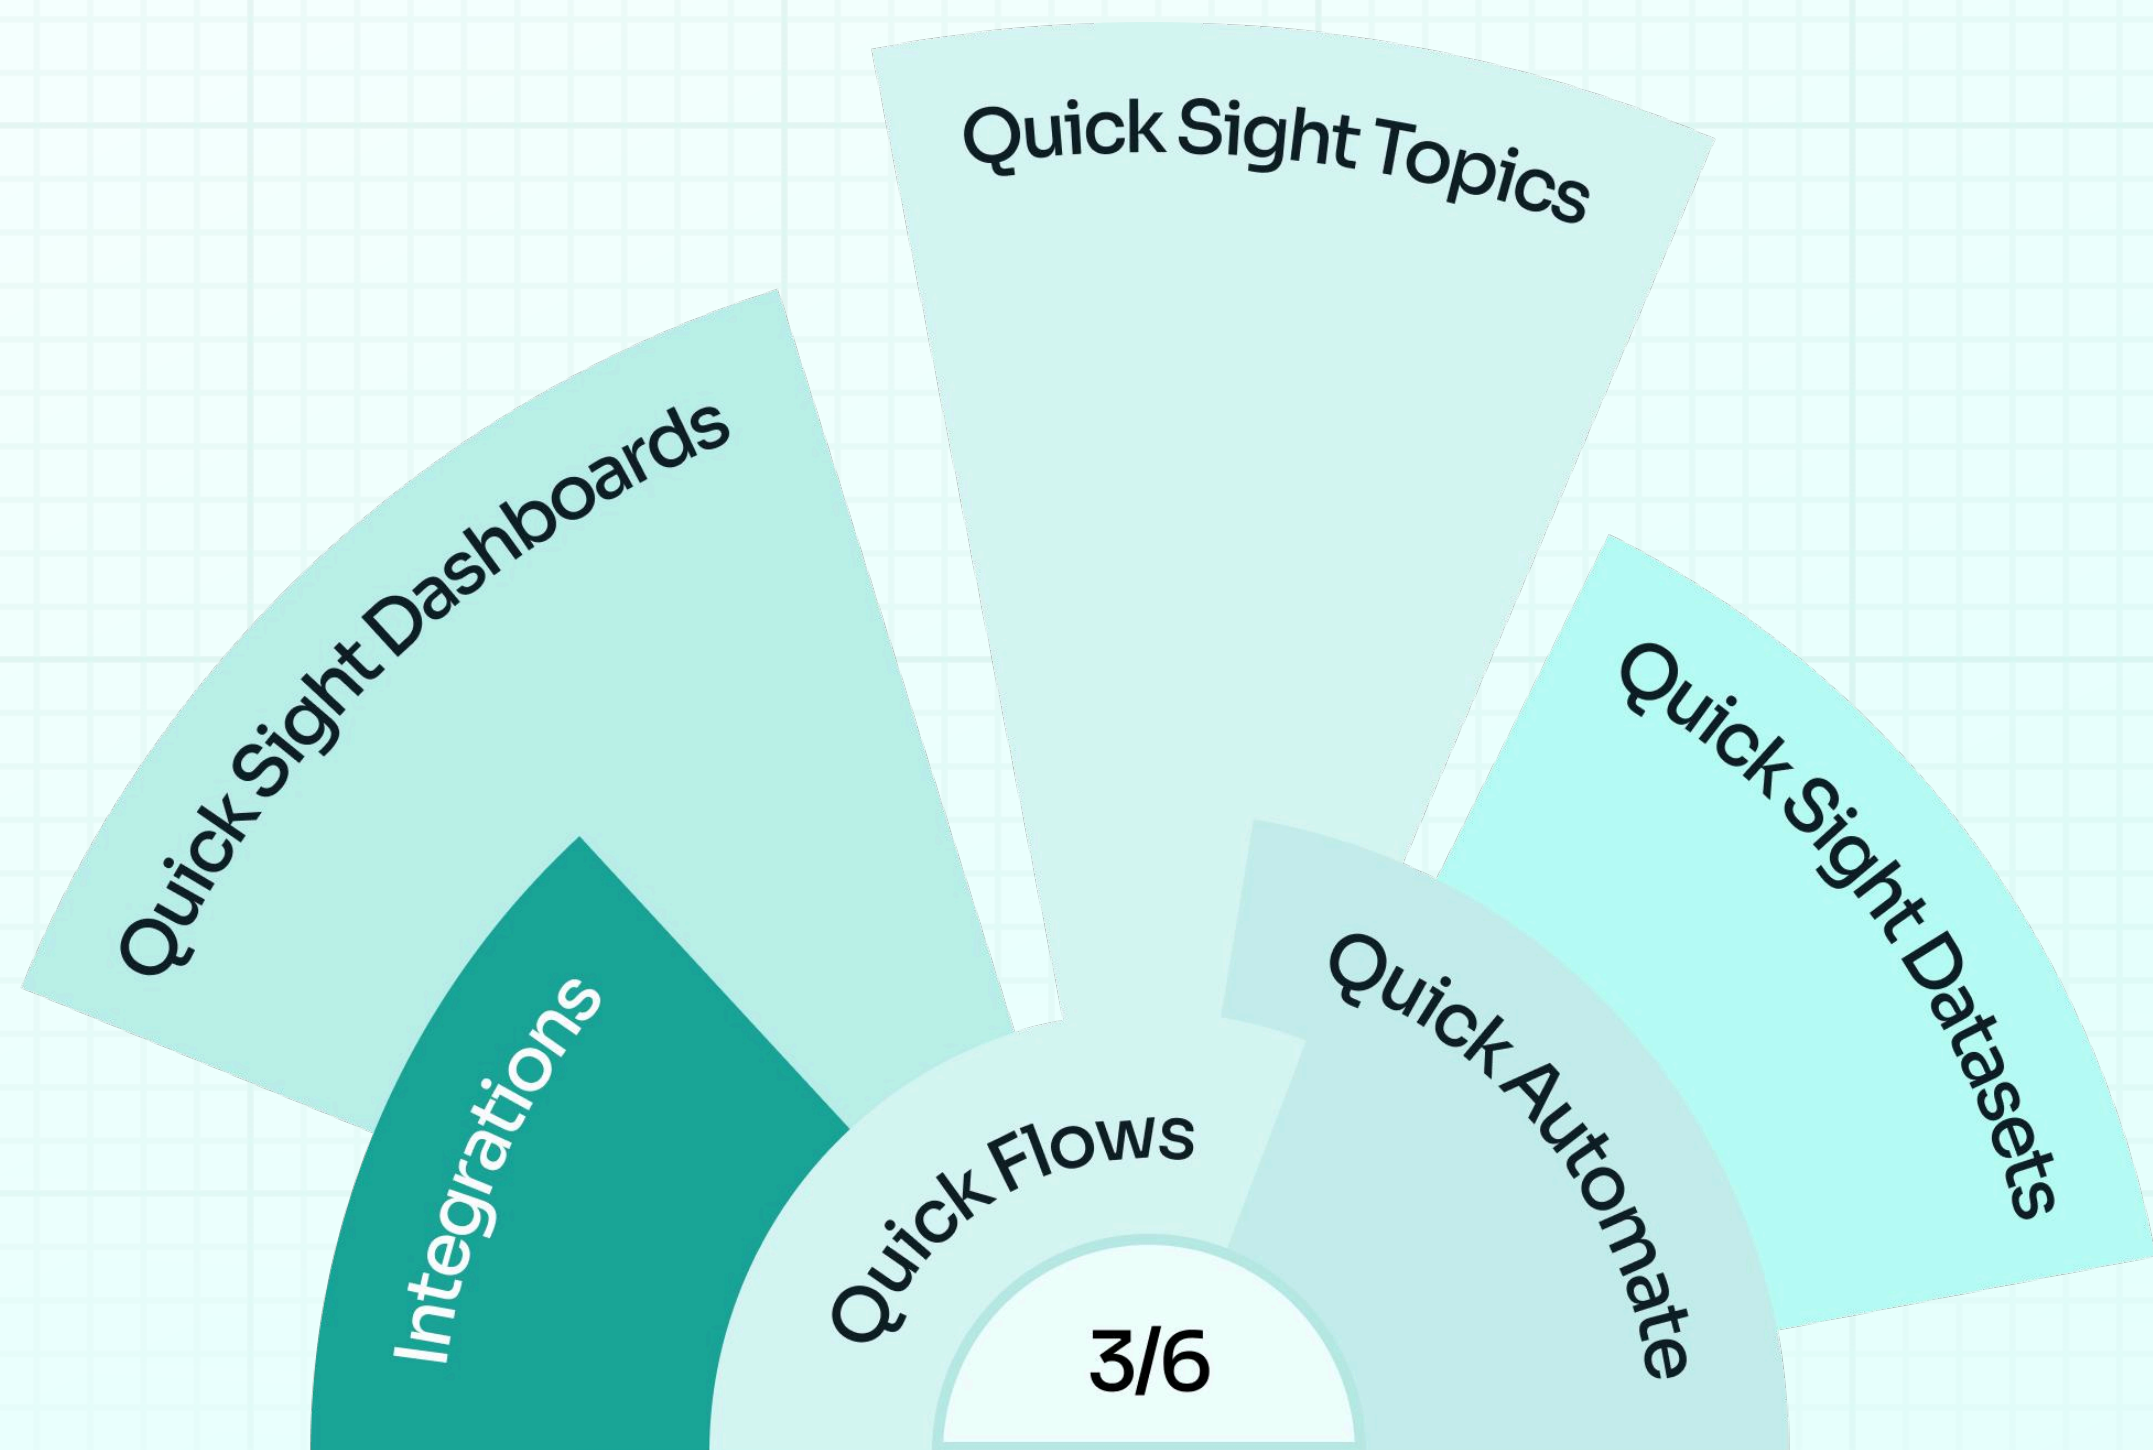

Quick Flows

- Design and deploy intelligent, multi-step automated workflows with minimal manual effort.
- Master conditional logic, triggers, and flow management to eliminate repetitive tasks across your organization.
- Enable business users and developers to collaborate on governed infrastructure to build and maintain automation at scale.

Quick Automate

- How to pull data from databases, data lakes, flat files, and SaaS platforms into a single governed layer.
- How to configure automated ingestion schedules so your datasets stay current without manual intervention.
- Applying data transformations and quality controls to ensure reliable, consistent data at scale.

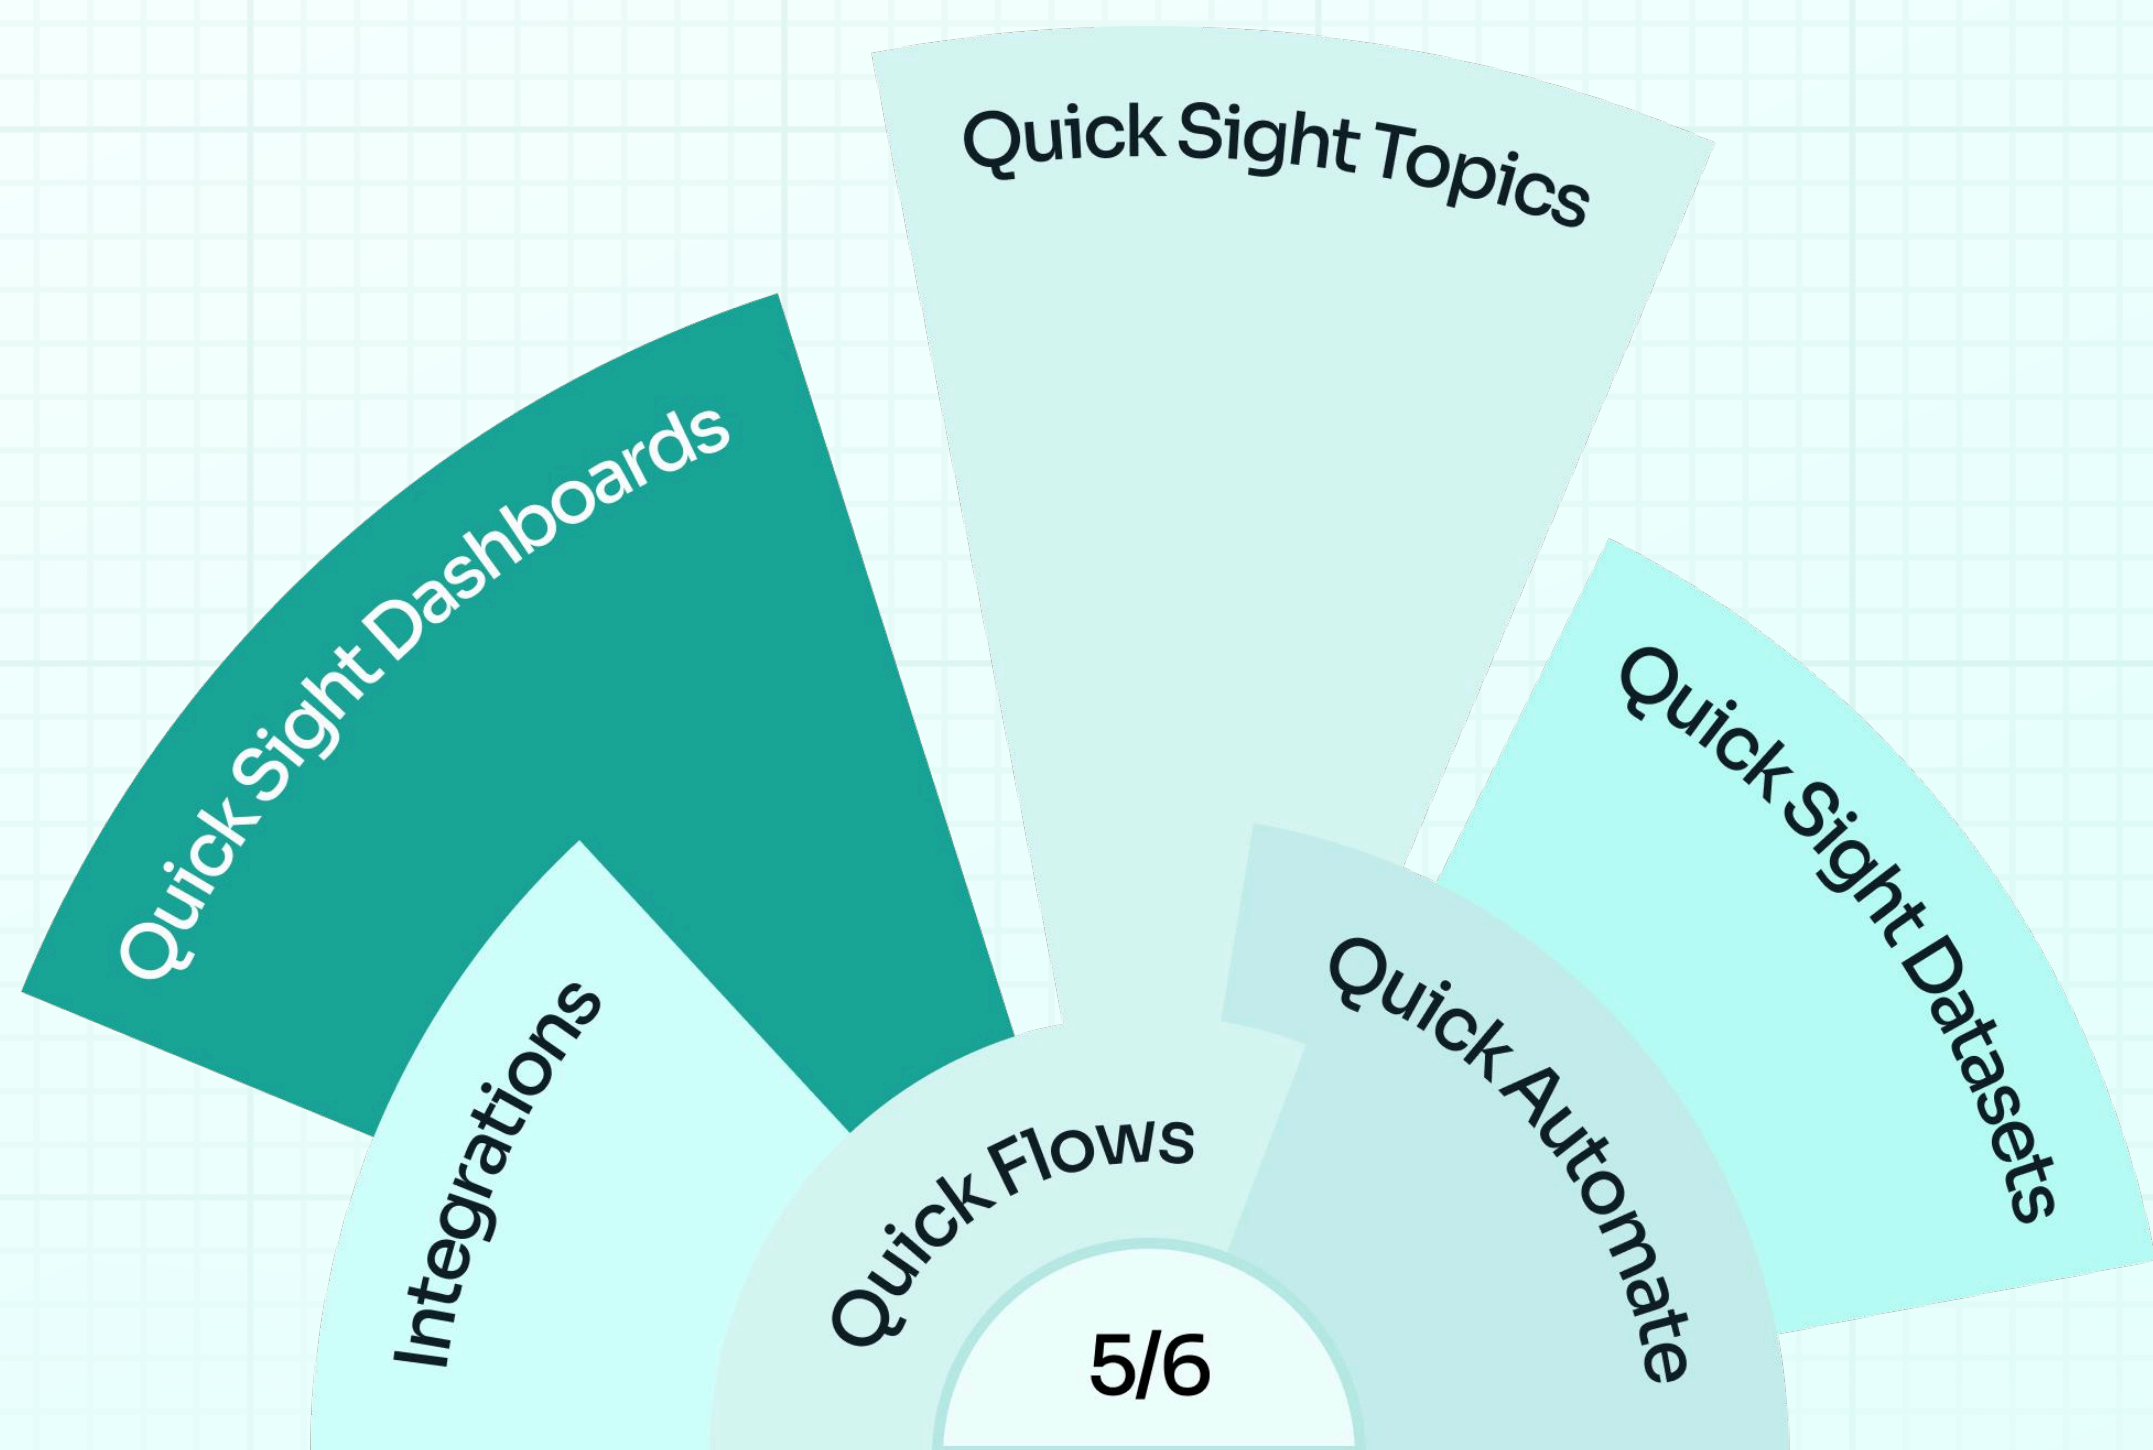

Integrations

- Explore native connectors for tools your teams already use, including Salesforce, Slack, Jira, Confluence, Microsoft 365, Google Workspace, Zoom, and more.
- Extend integrations further with OpenAPI and MCP support to connect proprietary, niche, or internally built systems without complex custom integration work.

Quick Sight Datasets

- Connect QuickSight to databases, file uploads, and cloud storage, creating a governed data layer.
- Set up automatic data refreshes so dashboards and reports always stay up to date without manual intervention.
- Visually clean and combine data before dashboards, controlling access to sensitive information for accurate, trustworthy insights.

Quick Sight Dashboards

- Create dashboards that highlight key metrics, with AI flagging anomalies and explaining changes.
- Embed analytics into internal apps, customer portals, or partner platforms with a branded experience that fits naturally into existing workflows.
- Enable teams to explore data independently with drill-downs, filters, personalized views, and exports, without relying on analysts or custom reports.

Quick Sight Topics

- Training on how to ask business questions in plain English and receive instant AI-generated charts and insights.
- Eliminate SQL dependency for accessible data exploration for all teams.
- Leverage generative BI features to dramatically cut time-to-insight and democratize data across your organization.

Built around your workflows.

Not a generic training session.

Email aws@emumba.com to plan a customized Amazon Quick workshop aligned with your business goals, team maturity, and use cases.
